

QFORT®

A business designed to last

We are one of the most reputable and solid entrepreneurial businesses, born in Romania, which operates internationally, manufacturing heat-insulating carpentry of the highest quality. The main countries in which we are located are Romania, Italy, France, Austria, Belgium, Germany, Great Britain and Switzerland.

The customer is always at the center of the business, and our goal is to understand his needs and make the best recommendation. We do not offer simple products, but a complete experience.

Our PVC and Aluminum solutions (windows, entrance doors, sliding systems, shading systems) stand out for their durability, performance in terms of thermal and sound insulation, and also for their modern design, bringing extra comfort to any space.

What differentiates us from our competitors, providing at the same time a unique and relevant benefit to our business, is the time-proof and weather-resistant strength of the products we manufacture and trade in. This translates to our promise of value – QFORT Designed to last – the promise that QFORT products are manufactured

according to best product quality practices to provide the customer with the easiest, and most worry-free maintenance and ultimate durability in terms of time and weather.

With 20 years of experience in the field, we have built over time a network of over 1.000 commercial partners, with more than 1.100 sales points at European level. In order to create high-quality thermally insulating window and door systems, we have invested approx. 110 million euros in modern production, logistics and distribution capabilities.

With over 1.500 employees, we have one of the most modern production capacities in Europe with a total area of 106.646 m² and 7 production halls.

We also emphasize the sustainability of our business, which is why we have installed on the QFORT platform a complex system of solar panels that have produced, in 2023, 790.66 MWh representing 17.18% of the consumption requirement.

These investments are a guarantee that all our customers will benefit from high-performance windows and doors, which will ensure comfort and safety in the long term.
